

Example of a Mission Statement for a Dental Practice

Our Mission

Our mission as individual dental professionals is to make a difference in each patient's life. We care deeply about our patients, and we are committed to help them maintain dental health for a lifetime. We will continue to improve our professional skills through continuing education and determination to be the best.

Our mission as a dental team is to work together as a unit to provide the best dental care available for all ages, caring for them as we would family members. We treat our patients with patience and kindness. We are committed as a team to avoid complacency, choosing instead to stay on the cutting edge of dentistry through continuing education and use of the latest and best treatment modalities, materials, sterilization techniques, and technology.
